Comment. The present report, according to which the AT regiment consists of 6 batteries equipped with a total of 24 x 76.2-mm guns agrees with previous information.

25X1

3 battalion headquarters were deactivated in the summer of 1953, after 3 batteries had been transferred to the former Zittau Artillery Instruction Regiment of TV 3000. The total strength of the regiment (approximately 700 men, including the regiment school) would be adequate to organize 3 additional batteries. Previously the AT regiment consisted of 3 battalions with 3 batteries to each battalion.
